CUTTING TABLE FOR ROLLER BLINDS UK-2 ECO

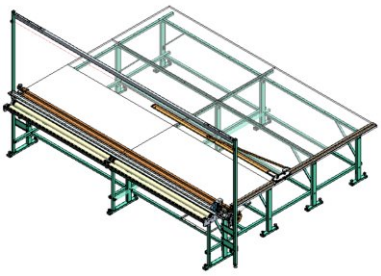

The UK-2 ECO cutting table for roller blinds is a versatile machine for production of roller blinds that is adaptable to your needs. The machine is equipped either with a semiautomatic round knife or with a manual round knife with an option of a later upgrade to an ultrasonic manual knife in order to create a manual cutting solution with interchangeable knives. Among other additional options, it is possible to equip the table with a pneumatic clamp, inspection screen, digital measuring stop for the fabric, and adjustment of cutting width to fit your needs.
The UK-2 ECO cutting table for roller blinds is made of powder-coated steel profiles, and the tabletop is made of an MDF board of 25 mm thickness with aluminium edges to ensure construction durability.
