FABRIC REWINDING, INSPECTION AND CUT-TO-LENGTH MACHINE CTLR-2000-K3-0028

Key features:

- Machine is designed to cut exact length and winds fabric onto a core.
- Best suitable for non-elastic fabrics.
- Fabric edge sensor for even edge during rewinding.
- Inspection backlighting screen allows for inspection of damaged fabrics.
- After exact length is measured the automatic rolls stop and knife cuts through fabric.
- Speed is adjustable on front and back feed rollers.
- Machine can be produced with different specifications.
- Control panel has high quality touchscreen.
- User-friendly interface available in Polish, English or Russian (other languages upon request).

Specifications:

Roll maximum width: 2000 mm
Roll maximum diameter: 400 mm
Roll maximum weight: 40 kg
Overall dimensions (DxWxH): 1953x3332x1285 mm
Max. Rewinding speed: approx. 24m/min
Voltage: 230 V AC
Power: 0,9 kW
