# MANUAL LENGTH MEASURING STOP WITH TABLE PR-1/S

Is designed for fast and accurate length determination of the cut profile (e.g., pipes, rail, boxes, etc.), equipped with a manual stop. The positioners are installed on a table with equipped tabletop.

Main advantages:

- The tabletop with rollers.
- The construction is made of anodized aluminium.
- Fast and easy movement of the stop mounted on an aluminum rail.
- Ability to set the stop in any position and fix it using handle.
- Length measuring range from 1m to 6m - can be made to measure.
- All electronic components are protected against dust and dirt.
- Lightweight and durable construction can be placed on any table.
- PR-1 with electronic display which measures using a magnetic line, the measurement accuracy is 0.1 mm.
