ROLLER BLINDS CONTROL LIFT WK-1

Control lift (Inspection hoist for blinds) is designed for testing of roller blinds. This control lift allows checking the levelness of slats in the blinds. Checking the blinds ensures that the fabric is properly winded on tube and to make adjustments if necessary.

- Foot-controlled
- Different types of holders for different types of blinds
- Fast and efficient inspection of the blinds
- Adjustable design for different size blinds
- Light and stong construction.

Specifications:

Power 0,4 kW 3x380V/50Hz or 230V/50Hz
Dimensions 3000x3000x500 mm*
Guide maximum height 3000 mm (4000 mm optional)
Maximum width 3000 mm (4000 mm optional)
Slider’s speed approx. 0,3 m/s
Weight approx. 60 kg
Maximum bearing capacity: 20 kg (44 lbs)

* Custom sizes are available on request. Standard equipment includes only TYP-2 roller blind holders (2 pcs). Other holders made to order.
