ROLLER BLINDS FABRIC INSPECTION TABLE SP-1/ER

SP-1/ER is a universal table for checking the roller blinds fabrics with a convenient unwinding device. The standard width of the module is 3 meters, which allows to use it with a wide variety of fabrics. During the unwinding and checking process, the material is led through the dark tabletop, which allows to check the fabrics in a high-contrast environment, and then through the backlight, which allows to easily look for potential damage or production faults in the fabrics. After the material is led through the checking area, it falls into storage area, out of which it can be taken out easily at the end of the checking process.

The device is made out of powder-coated steel profiles. The upper part of the table is made out of aluminum profiles, MDF tabletop, and backlight. The unwinding system consists of 2 movable pipes.

Specifications:

Model: SP-1 ER

Overall dimensions: 309 x 161 cm

Working width: 300 cm

Working length of the tabletop: 60 cm

Working length of the backlight: 60 cm

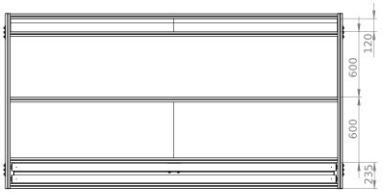

Unwinding pipes: 2 pcs.

Backlight: YES

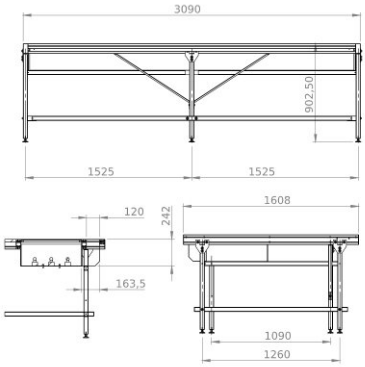

Storage area: YES
