SELF SERVE CAR WASH DRYER BLOWER FUKA

The FUKA machine is an advanced, self-service car dryer engineered to deliver professional, touch-free drying for vehicles. It utilizes high-velocity airflow exceeding 500 km/h, providing a streak-free finish while being energy-efficient and environmentally friendly. Its robust design, combined with noise reduction technology, makes it suitable for both indoor and outdoor installations.

Key Features:

- Powerful airflow over 500 km/h.
- 270 degree rotating head with arm equipped with soft flexible hose with blowing nozzle.
- Touch control panel and LCD display.
- Contactless payment terminal, optional coin acceptor.
- Heated air enables efficient and rapid water removal.
- Low energy consumption of just 3.6 kW.
- Touchless drying, preventing scratches.
- Built-in air filtration and noise control.

Specifications:

- Power: 3.6 kW
- Voltage: 1~230V or 3~400V
- Air temperature: More than 20°C above ambient
- Installation: Indoor/Outdoor compatible
- Manufacturer: REXEL
- Brand: FUKA
