SEMI-AUTOMATIC CUTTER FOR THICK MATERIALS OT-2/AH

Key features:

- The OT-2AH semi-automatic cutter with a NTH125W-2AH circular knife, due to the high power of the circular knife drive motor and the feed drive motor, is primarily designed for cutting thicker layers of lightweight materials (up to 80 mm) such as quilted fabrics, insulation, wadding, upholstery foam, or thinner layers of difficult-to-process materials such as felt or coconut mats.
- Using the cutter will increase productivity and ensure quick and accurate cutting of the desired fabric length.
- It can be installed as an additional accessory to a classic cutting table, a cutting table with a spreading device, a fabric inspection and rewinder, or a fabric rewinder.
- The cutter is equipped with an electronic cut counter as standard.
- Cutting tables are manufactured individually to individual orders.

Specifications:

Model: OT-2AH
Cutting width range: 1000 - 3000 mm (39.37" - 118.11")
Power supply voltage: 230 V
Cutting knife motor power: 380 W
Feed motor power: 250 W
Blade diameter: 125 mm (4.92")
Blade rotational speed: 1500 RPM
Cutting cycle time: 8 seconds (+/- 1 second) for material 2000 mm (78.74") wide
