TILT ABLE PACKAGING AND ASSEMBLY TABLE SOP-1

Key features:

- The table can be used for packing elements, assembly of larger parts. The tilting top allows easy removal or placement of the element from an almost vertical position.
- Table made of powder coated steel profiles.
- Table top finished with stainless steel.
- The table top tilts down to 80 degrees.
- Distance from the floor to the edge of the tabletop - 120 mm.
- The use of an electric motor ensures high stability of the table in every position of the table top.
- The solutions used exclude the possibility of the table top falling down automatically after a power outage.
- Comfortable control via foot pedals.
- An additional hanger mounted on the back of the table for foil roll or packaging paper.

Specifications:

Table top size: 1800x1600 mm (70.86” x 62.99”)
Weight: 330 kg (727 lbs)
Voltage: 230 V
Power: 1.5 kW
Maximum bearing capacity: 100 kg (220 lbs)
